Important Note:

MBC products are often designed and tested in accordance with requirements established by the American Architectural Manufacturer's Association ("AAMA") and National Fenestration Rating Council ("NFRC") which measure performance criteria in a laboratory setting or by simulation. MBC manufactures their products for original product sale using the same methods and materials as in the tested sample product. Given the tolerances inherent in materials and manufacturing, as well as the potential effect of handling and usage, a variance in individual performance values from those obtained in AAMA and NFRC testing may exist. Such variations do not constitute an impairment of operation or usage and do not constitute a covered defect. Non-standard sizes and mulled product may not be rated or supported by AAMA certification testing. This limited warranty gives you specific legal rights and you may also have other rights that vary from state to state.

Important Information Regarding Door Safety

Every family member should know how to operate the doors used for fire emergencies. Delays in escaping from a fire costs lives and increase injuries. Make sure your doors open easily from the inside and are not blocked by furniture or other objects. Remember that security bars, grills, and grates not only keep intruders out, they can also lock you in. The same holds true for door guards. In an emergency everyone should always be able to get out through an operable door without using tools, keys, special knowledge or effort.

WARNING! NEVER DEPEND ON INSECT SCREENS TO PREVENT FALLS. INSECT SCREENS ARE DESIGNED TO PROVIDE VENTILATION AND KEEP INSECTS OUT. INSECT SCREENS WILL NOT HOLD EVEN A PORTION OF A CHILD'S WEIGHT AGAINST THEM.
